Source: 2013-14 California Health Interview Survey

CDP = Census Designated Place

Note: Estimates of prediabetes are based on predictive models developed using 2009-2012 NHANES data and applied to CHIS 2013-14 data. Prediabetes estimates

include adults with undiagnosed diabetes. Nationally, approximately 3.9 percent of adults have undiagnosed diabetes. City and legislative district estimates were produced using small-area estimation methods (SAE). Estimates are not available for areas with populations below 15,000 in the target age group.
